<Hidden Aspects of Communication: Cultural Use of Space/Time>

1. Cultural Use of Space

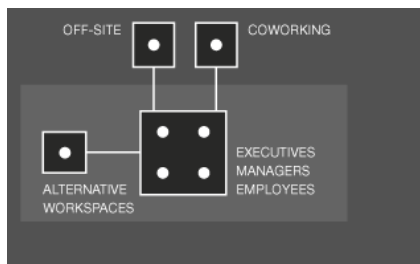

How Does Culture Shape the Office?

by Christine Congdon and Catherine Gall
Harvard Business Review (May 2013)

<autocratic, high context>

In China, India, Russia, and Morocco, firms share a high tolerance for density and are extremely hierarchical. Many employers optimize their office layouts by reducing workers' space and giving managers and executives plenty of room.

<consultative, low context>

In the U.S., UK, Germany, and the Netherlands, spaces reflect a progressive view of work, with all levels of employees sharing spaces. At the same time, workers don't like to feel crowded, which has led to the liberal use of "hotel" spaces and telecommuting.

Hofstede's Cultural Dimensions Theory

- (1) Power distance index (PDI)
- (2) Individualism (IDV)
- (3) Uncertainty avoidance (UAI)
- (4) Masculinity (MAS)
- (5) Long-term orientation (LTO)
- (6) Indulgence (IND)

Hall's High- and Low-Context Cultural Taxonomy

Edward T. Hall organizes cultures by the amount of information implied by the setting or context of the communication itself, regardless of the specific words that are spoken. Hall argues that every human being is faced with so many perceptual stimuli—sights, sounds, smells, tastes, and bodily sensations—that it is impossible to pay attention to them all. Therefore, one of the functions of culture is to provide a screen between the person and all of those stimuli to indicate what perceptions to notice and how to interpret them.

Low-context cultures prefer to use low-context messages, in which the majority of the information is vested in the explicit code. Low-context cultures include German, Swedish, American, and English.

-Example

A simple example of low-context communication is now experienced by more and more people as they interact with computers. For computers to “understand” a message, every statement must be precise. Many computers will not accept or respond to instructions that do not have every space, period, letter, and number in precisely the right location. The message must be overt and very explicit.

High context implies that a lot of unspoken information is implicitly transferred during communication. People in a high context culture tend to place a larger importance on long-term relationships and loyalty and have fewer rules and structure implemented.

_____ -Context Culture

-농경사회(집단주의) → 상대방이 나를 안다!

-Long-term relationship 중시

-말이 많은 것은 부정적

-말과 사고가 동시에 일어나지 않음

Ex) 조용히 문제 풀기

-아는 자는 말하지 않고 말하는 자는 알지 못한다. <노자, 중국>

-빈 수레가 요란하다. <한국>

-입은 불행의 원천이다. <일본>

♪말하지 않아도 알아요 ♪

⇒정확하게 소통하는 능력 부족 (핵심사안에 대해 글이나 말로 일목요연하게 정리하고 정확한 피드백 제공에 어려움)

_____ -Context Culture

-유목 사회, 다인종 국가 → 상대방이 나를 잘 모른다!

-진리 탐구의 과정: 웅변, 수사학

-생각하고 있으면 말할 수 있어야 함.

→ 사고 작용=언어 작용 (a principle of identity)

Ex) 말하면서 문제풀기

High- and Low-Context Culture

-Responsibility of communication?

Listener **vs.** **Speaker**

-Asking a question?

-More misunderstanding?

_____ -context culture

<Meyer, E. (2016). *The culture map*>

2. Cultural Use of Space

Monochronic Time	Polychronic Time
Linear (start-finish)	Free flowing
Focus on one thing at a time	Several things can be done at once (multi-tasking)
“Time is money.”	Relationship, Interaction
